

The Somers Energy Advisory Panel is charged by the Town Board to advise on subjects including, but not limited to energy conservation and the environmental impact of energy.

We have recently been awarded \$430,000 by NYSERDA to improve the lighting and control systems in the Somers Central School District buildings and to contract for an Energy Professional to help with strategy development and project prioritization.

We need help and additional expertise! If you are interested in “green building”, renewable energy, sustainable food, marketing outreach/social media, youth involvement, etc. **PLEASE JOIN US!**

Herb Oringel
Chair, Energy Advisory Panel
